ABOUT ME

Computer Science undergraduate at IILM University with CGPA 8.50/10 and experience in open-source development, machine learning, and software engineering projects. Contributed 9 pull requests to OpenMRS, including 1 merged contribution in a Spring Boot-based project. Built applications using Java, Python, MySQL, Streamlit, and React.js, with interests in Artificial Intelligence, System Design, and Backend Development.

CERTIFICATIONS

- AWS Solutions Architecture Virtual Internship (forage)
- Cloud Computing (NPTEL IIT Kharagpur)
- Software Engineer (Hacker Rank)
- GenAI Powered Data Analytics Job Simulation (TATA)
- DSA with Java (Apna College)
- Programming in C (Infosys Springboard)
- Introduction to Data Science (Cisco Networking Academy)
- Blockchain Emerging Technology (Skillsoft)

SKILLS

- Languages: Java, Python, C, SQL
- Tools & Technologies: Git, GitHub, MySQL, AWS, React.js, Supabase, Streamlit
- Core Subjects: DSA, OOP, DBMS, Operating Systems, Computer Networks, AI, System Design

ACHIEVEMENT & ACTIVITIES

- Team Leader – Smart India Hackathon 2025 (Finalist)
- Led a team of 6 members and qualified for national finals
- Participant – Code Arcade (IEEE, IILM University)
- Qualified Level 1 coding round at IILM coding event

Open Source Experience:

Open Source Contributor | **OpenMRS** (GSoC-aligned project)

- Contributed 9 PRs to OpenMRS under GSoC 2026 participation
- 1 PR successfully merged in a Spring Boot-based Nexus project
- Collaborated with 5+ open-source contributors and mentors through GitHub code reviews and debugging sessions
- Participated in 9 pull requests and worked with CI/CD pipelines to validate code quality before submission.

Internship Experience:

Cisco Networking Virtual Internship (AICTE EduSkills) | May 2026 – Jun 2026

- Worked with Cisco Packet Tracer to design and simulate network topologies.
- Learned networking concepts including TCP/IP, routing, switching, and subnetting.

PROJECTS

Auto Hydrate ML | Python, Streamlit, MySQL

- Engineered a machine learning-based hydration prediction system using health and lifestyle parameters.
- Integrated MySQL database to store user records and track hydration history.

Digital Lost & Found Management System | Java, MySQL, System Design

- Designed a digital platform for reporting, searching, and managing lost-and-found items in public places.
- Optimized item tracking and status management features to improve recovery efficiency.
- Focused on scalability and user-friendly workflows for students, organizations, and public institutions.

Crowdsourced Civic Issue Reporting System (CivicFix) | React.js, JavaScript

- Implemented issue categorization and tracking features to improve communication between citizens and authorities.
- Built a web platform that enables citizens to report local civic issues such as potholes, garbage, and streetlight failures.
- Created an intuitive user interface for easy issue submission and status monitoring.

E-Commerce Platform | MySQL

- E-Commerce Database Management System | MySQL, SQL
- Designed a normalized relational database schema (3NF) for managing customers, products, orders, and payments.
- Implemented SQL queries, joins, aggregations, and relational algebra operations for efficient data management.
- Executed ER diagrams and relational models to ensure data integrity and reduce redundancy.
